

Topotecan hydrochloride

CAS

119413-54-6

Status

Commercial

Inquiry

Topotecan hydrochloride is a semisynthetic derivative of camptothecin from *Camptotheca acuminata*. It inhibits the DNA topoisomerase I, which is often overactive in tumors. Stagnant cells are not affected. It is therefore a cytostatic agent for strongly expressing cells. It is used in refractory (metastatic) ovarian cancer and small cell bronchial carcinomas.

Description

Formula $C_{23}H_{23}N_3O_5 \cdot HCl$

Molecular weight 457.91 g/mol

Molecular size small

Controlled Substance no

Precursor no

Indications Antineoplastic drugs
